

Introduction to the Internet of Things

Why?

We want to receive more data

We want to control stuff

We want to automate

We want to make things faster

What is the Internet of Things

Sensors

Measure values

Send raw data

Low power

Local Processing and Local Storage

Get data from sensors

Process

Send some data to

Edge/Fog Computing

Network and Internet

IoT Gateway

Gathers data from sensors

Gateway Protocols

- 6LoPAN
- LoRaWAN
- BLE

Internet Protocols

- CoAP
- MQTT
- HTTP
- XMPP

Cloud Processing and Storage

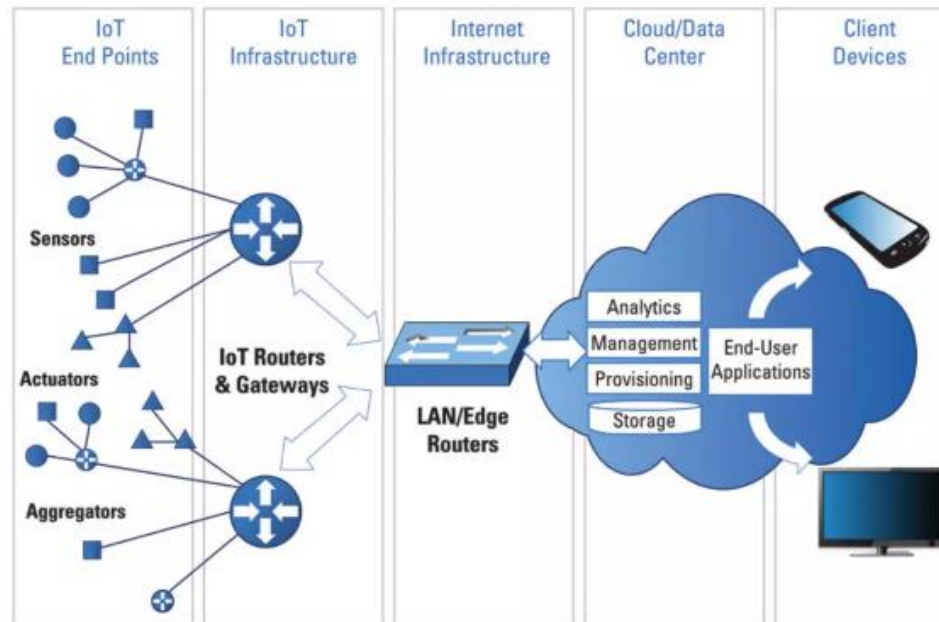

Aggregate Data

How did it start

open source
hardware

Microcontroller

Small programmable device

Easy connectable

Arduino

Small programmable device

Easy connectable

Is open source

Has a simple to use software

Arduino Ethernet

Small programmable device

Easy connectable

Is open source

Has a simple to use software

Only around 4 simultaneous networking connections
